# XPRISON

## COLLECTORS GAME

---

WHITE PAPER

---

*Version 1.0 | May 2026 | [xprisonbossboard.com](https://xprisonbossboard.com)*

*Hold NFTs. Earn XRP. Rule the Board.*

# 1. Executive Summary

---

The XPrison Collectors Game is a gamified NFT reward system built on the XRP Ledger (XRPL). It transforms passive NFT holding into an active, ongoing competition where collectors earn monthly XRP rewards simply by holding verified XPrison NFTs in their wallets.

Each month, a snapshot of all registered wallets is taken on the 5th. Holders are ranked by a multiplier-weighted score derived from the types and quantities of XPrison NFTs they hold. The top-ranked collectors receive XRP distributions from the XPrison Prize Pool, with payouts delivered automatically to their wallets within 24 hours of the snapshot.

This document outlines the mechanics, architecture, tokenomics, and roadmap of the XPrison Collectors Game — providing transparency for current and prospective collectors.

## 2. Problem Statement

---

Most NFT collections on any blockchain face the same fundamental challenge after the initial mint: there is little ongoing incentive for holders to retain their NFTs. Once floor prices stabilize or decline, collectors are left asking a simple question:

### THE CORE PROBLEM

"Why should I continue to hold these NFTs?"

Without a compelling answer, holders sell, floor prices drop, and the community erodes. The XPrison Collectors Game solves this by introducing a clear, recurring, and tangible benefit to holding: monthly XRP rewards funded by secondary market activity and dedicated treasury allocations.

## 3. How It Works

---

### 3.1 The Leaderboard

The XPrison Leaderboard, accessible at [prison.xyz](https://prison.xyz) or [xprisonbossboard.com](https://xprisonbossboard.com), displays the top 40 wallets with the highest point totals. Each wallet is ranked by its Score — a number calculated from the NFT point values and multipliers across the selected XPrison collections held in that wallet.

## 3.2 NFT Collections

XPrison currently spans seven NFT collections, all issued from the same XRPL issuer wallet. Currently only 4 are activated in the game. The XPRISON, Breakout, 1of1 and Lifers collections are currently providing points for holders. Holding NFTs from multiple collections stacks points and multipliers, rewarding diverse collectors.

## 3.3 Point Calculator

### XPrison Collection

Each NFT is worth 1 point with the exception of the "SUIT" which is worth 10 points and has a X1 multiplier. PSYCHO rooms remain worth 1 point but have a X2 multiplier attached.

### Breakout Collection

Each NFT is worth 1 point with the exception of "Bounty Hunters" and "Most Wanted" NFT's. Both are worth 5 points each and have a X2 multiplier attached.

### 1of1 Collection

Each NFT is worth 20 points and has a X2 multiplier attached.

### Lifer Collection

Each NFT is worth 10 points and comes with an option to spin a prize wheel that can result in points being given, points being lost, or points being multiplied

### Womans Lockup

Each NFT is worth 1 point with the exception of "SUITS" which are worth 10 points with a X1 multiplier attached, PSYCHO rooms remain 1 point with a X2 multiplier attached. This collection will also have a total of 20, 1of1's with a value of 20 points each and a X2 multiplier attached. There will also be 7 NFT's, each with a trait that honors a community that the Xprison project is close with. They will be worth 5 points each.

## 3.4 Blocks — Prize Tiers

Collectors are assigned to a Cell Block (D Block, C Block, B Block, Gen Pop), Their block placement is based on their ranked position on the leaderboard. Higher-ranked wallets occupy premium Blocks and receive a proportionally larger share of the monthly prize pool. Blocks are determined at the time of each monthly snapshot.

## 3.5 Snapshot & Distribution Cycle

The monthly cycle operates on a fixed schedule:

**Leading up to snapshot:** Collectors accumulate, hold, flip, and deploy various game strategies in order to position themselves accordingly.

**5th of the month (Snapshot Day):** The bot syncs on-chain NFT data for all registered wallets. A snapshot is immediately taken, recording each wallet's rank and Block assignment.

**Day 5–6 (24hr Claim Window):** Collectors visit [xprisonbossboard.com/claim](https://xprisonbossboard.com/claim), authenticate their wallet, and submit their claim for the month's reward.

**Day 6 (Auto-Distribution):** All verified claims are automatically distributed from the Prize Pool wallet directly to collectors' wallets via XRPL payment transactions. Unclaimed rewards are returned to the treasury.

## 4. Registration & Wallet Sign-In

---

In order to collect rewards, holders must register their XRPL wallet address via the claim portal. Registration is free and requires only a cryptographic wallet signature — no seed phrase, private key, or transaction fee is ever required.

### 4.1 Supported Wallets

The XPrison Claim Portal currently supports two industry-standard sign-in methods:

- Xaman (formerly XUMM) — Scan a QR code with the Xaman app. The app presents a sign-in request; approving it proves wallet ownership and logs you in instantly.
- Joey Wallet — Connect via WalletConnect v2. Scan the QR code or tap the "Open in Joey" deep link to authenticate directly from the Joey mobile app.

Both methods use industry-standard cryptographic proof-of-ownership. No funds are ever moved during authentication. Support for additional XRPL wallets may be added in future releases.

### 4.2 Security Model

Wallet sessions are server-side and time-limited. Authentication payloads are created via the XUMM API (for Xaman) and WalletConnect v2 (for Joey). Once a wallet authenticates, its address is stored in the registration database and associated with any snapshot rankings taken after that date.

# 5. Prize Pool & Tokenomics

---

## 5.1 Funding Sources

The XPrison Prize Pool is funded from two primary sources, ensuring long-term sustainability without requiring ongoing community donations:

- Secondary Market Royalties — All secondary sales of any XPrison NFT flow into the Vault wallet. On a monthly basis, 500 XRP is transferred from the Vault to the Prize Pool wallet.
- Mint Revenue Allocation — The majority of future mint proceeds are designated directly for prize pool funding (see Section 5.3).

## 5.2 Bootstrap Funding (Months 1–2)

To launch the Collectors Game immediately and demonstrate commitment to the community, the XPrison founding team (OG Suits) personally funded the first two months of prizes:

**BOOTSTRAP COMMITMENT**

Month 1: 500 XRP (personally contributed by OG Suits)  
Month 2: 500 XRP (personally contributed by OG Suits)

Total Bootstrap: 1,000 XRP

## 5.3 June 2026 Mint — Long-Term Prize Pool

The upcoming June 2026 XPrison collection mint is designed to provide significant, long-term funding for the prize pool. The projected mint revenue of 10,000 XRP will be allocated as follows:

Allocation	Amount (XRP)	Purpose
------------	--------------	---------

Artists & Operational Costs	2,000 XRP	Compensate artists and cover infrastructure expenses
Future Development Fund	2,000 XRP	Token development, yield farming, future initiatives
Prize Pool (12+ Months)	6,000 XRP	Monthly prize distributions for Collectors Game
<b>Total</b>	<b>10,000 XRP</b>	

The 6,000 XRP prize pool allocation, combined with ongoing secondary royalty injections, is designed to sustain monthly distributions for 12 months or more, creating a predictable and long-lasting incentive for collectors.

## 5.4 Treasury Wallets

The prize pool ecosystem operates through two dedicated XRPL wallets, both of which are visible on-chain and monitored by the leaderboard's treasury balance display:

- Vault Wallet — Receives secondary market royalties. Acts as the long-term treasury reserve. Transfers 500 XRP monthly to the Prize Pool.

Prize Pool Wallet — The active distribution wallet. Receives monthly injections and pays out verified claims directly to collector wallets.

# 6. Roadmap

---

## Phase 1 — Foundation (Complete)

- Launch leaderboard at [xprisonbossboard.com](https://xprisonbossboard.com)
- Implement XUMM (Xaman) and WalletConnect (Joey) sign-in
- Deploy registration, snapshot, and auto-distribution system
- Fund Month 1 and Month 2 prize pools (1,000 XRP by OG Suits)
- Add treasury balance display to leaderboard

## Phase 2 — Growth (June 2026)

- Launch new XPrison collection mint targeting 10,000 XRP
- Allocate 6,000 XRP to prize pool for 12+ months of distributions
- Onboard new collectors via mint campaign
- Expand leaderboard analytics and holder stats

## Phase 3 — Expansion (H2 2026+)

- Explore XPrison token / yield mechanism with Future Development Fund
- Launch future NFT collections to enrich and add dynamics to the game
- Introduce clothing line and other merchandise made available through the projects website <https://xprison.xyz/>

## 7. Disclaimers

---

This white paper is provided for informational purposes only. XRP prize pool amounts are estimates based on current projections and are subject to change based on secondary market activity, mint results, and treasury management decisions.

Participation in the XPrison Collectors Game does not constitute an investment contract. NFT values may fluctuate. Past prize distributions do not guarantee future distributions. The XPrison team reserves the right to modify game mechanics with community notification.

All blockchain transactions are irreversible. Collectors are responsible for the security of their own wallets and private keys.
